KO:EVE-4
AEG 2.5+
SKU: 105-00014

While the KO:EVE-4 AEG may look like “just another M4”, we’ve made dramatic improvements to the overall design and feel of this game-changing AEG. The high-strength, polymer receiver set and MLOK handguard is a pound lighter than her sister AEG, the Ronin T6.

The side charging handle allows for convenient hop up adjustment and the integrated pistol grip is optimized for maximum ergonomics. The KO:EVE-4 comes with KO’s new slim line vertical grip and maintains it’s compact footprint using KWA’s tried and true PDW stock. PTS Enhance Polymer Sights, two port muzzle brake, ambi fire controls, and optional quick detach sockets front and rear round out the external package. Internally, the KO:EVE-4 shares the same 2.5+ VPS gearbox as the TK.45c, Ronin T6, QRF Mod Series, Ronin 47. Install your favorite aftermarket electronic trigger group, and you have an ultra-responsive and lightweight polymer AEG with legendary KWA performance.

SPECIFICATIONS

Length Retracted:	21
Length Extended:	26
Height:	9
Outer Barrel Length:	7
Inner Barrel Length:	7 3/8
Rail Length:	5 1/2
